Fiber Optic Cable Sales Equipment

Overview

Based in Silicon Valley, California Bay Area, Fosco has delivered expert optical solutions since 2001.

Key Takeaways

Fiber optic cable sales equipment includes production machinery, installation tools, testing devices, and rental or purchase options from specialized suppliers.

Production Equipment

For manufacturing fiber optic cables, companies like Rosendahl Nextrom and Roblon provide comprehensive solutions. Rosendahl Nextrom offers equipment for optical glass making, fiber drawing, fiber coating, ribbon making, proof testing, and complete fiber optic cable production. Their systems include high-resolution monitoring for quality control, such as the EFL monitoring system that tracks fiber length in real time to reduce scrap rates.

Roblon specializes in cable binders, servers, precision winders, and reinforcement fibers with coatings for water-blocking and rodent resistance, supporting robust cable production.

Sales and Rental of Fiber Optic Tools

© 2026 CJC FIBRE CONSULTANTS - All rights reserved

For field applications, suppliers like FiberOptics.com and Fiber Instrument Sales (FIS) provide a wide range of fiber optic equipment. Products include: Fusion splicers and cleavers for joining fibersOTDRs (Optical Time-Domain Reflectometers) for testing cable integrityLaser sources and power meters for signal measurementPatchcords and multifiber cable assembliesPanels and enclosures for network management Fiber Instrument Sales maintains a large inventory, often shipping the same or next day, while FiberOptics.com also offers rental options for temporary needs and calibration, maintenance, and repair services.

Training and Support

Many suppliers provide certified technical training for fiber optic installation and testing. For example, Fibreplus Ltd offers Level 2 and Level 3 courses, ECS card certification, and training in partnership with brands like VIAVI and Sumitomo. FiberOptics.com also conducts professional courses through The Fiber School, covering installation, testing, and maintenance.

Choosing the Right Equipment

When selecting fiber optic cable sales equipment, consider: Purpose: Production vs. field installation/testingCapacity: Single fiber vs. high-density ribbon cablesSupport: Availability of training, calibration, and repair servicesFlexibility: Rental options for short-term projects or specialized tools By combining production machinery, field tools, and training, businesses can efficiently manufacture, install, and maintain fiber optic networks while ensuring high-quality performance and compliance with industry standards.
