Price of circuit breakers for household electrical distribution boxes

Overview

Circuit Breakers Whatever you're looking for – from our popular Cutler Hammer breakers and Siemens breakers to Square D QO breakers and Homeline breakers.

Key Takeaways

A typical household breaker box with standard circuit configuration costs between $1,200 and $5,000, depending on amperage, number of circuits, and installation complexity.

Typical Costs

Breaker Box / Panel: Residential panels range from $100 to $800 for standard 100–200A panels, with higher-end or smart panels costing more. Circuit Breakers: Individual breakers vary by type: 1P (Single Pole): $5–$15 each, suitable for standard room outlets. 1P+N (Single Pole + Neutral): $10–$25 each, provides protection for both live and neutral wires.

2P (Double Pole): $20–$50 each, used for main switches or high-power appliances like stoves or air conditioners. For a typical home, a configuration might include: 1 main 2P breaker8–12 room socket circuits (1P or 1P+N)2–4 high-power appliance circuits (2P)2–4 lighting circuits (1P) This setup could require 15–20 breakers, adding roughly $150–$500 for the breakers alone.

Installation and Labor

Labor and permits: Installation costs vary widely by region and complexity. A simple 100A panel replacement may cost around $1,400, while a full 200A upgrade with additional circuits, outdoor placement, or meter relocation can reach $5,000–$9,000. Additional costs: Weatherproof enclosures, sub-panels, or specialized breakers (AFCI/GFCI or smart breakers) can increase the total cost.

Practical Tips

Consolidate circuits where possible to reduce the number of breakers. Choose standard panels and breakers to minimize costs. Obtain multiple quotes from licensed electricians to ensure competitive pricing.

Ensure the configuration meets local electrical codes and safety standards. By combining the panel, breakers, and installation, a typical household distribution box configuration will generally fall in the $1,200–$5,000 range, with higher-end setups or complex installations exceeding this range.
