Overview

Deliveries and prices Our 100% Belgian cable support systems are currently available all over Europe. If you would like to be put in touch with your distri.

Key Takeaways

Cable tray supports in Belgium typically range from €10 to €150 per unit, depending on type, material, and load capacity.

Overview of Cable Tray Supports

Cable tray supports are essential for safely installing and managing electrical wiring without underground work. Common types include: Wall Supports: Fixed to walls for permanent installations, suitable for medium to heavy loads. Hanging Supports: Suspended from ceilings or beams, height-adjustable, ideal for flexible layouts.

Floor Supports: Provide a stable base for heavy cable loads, protecting cables from moisture. Stair Supports: Designed for multi-level installations, capable of handling additional weight.

Right-

Angle Supports: Secure trays at right angles to walls or structures.

Price Estimates

The price of cable tray supports in Belgium varies based on material, load rating, and supplier: Light-duty supports (aluminum or light steel, small spans): approximately €10–€30 per unit. Medium-duty supports (galvanized steel, standard load capacity): approximately €30–€70 per unit. Heavy-duty supports (stainless steel, high load or outdoor use): approximately €70–€150 per unit.

Specialized supports, such as adjustable hanging systems or stair supports, may cost more due to customization and installation flexibility.

Factors Affecting Pricing

Material: Galvanized steel is common for industrial use, stainless steel for corrosive environments, and aluminum for lightweight applications. Load Class: Supports designed for heavy cable loads or long spans are more expensive. Supplier Type: Domestic Belgian manufacturers like Trayco may offer competitive pricing and tailored solutions, while international brands may charge a premium for specialized products.

Project Scale: Bulk orders for large construction or industrial projects may reduce per-unit costs, whereas small-scale or retrofit installations may be more expensive per unit.

Market Context

The Belgian cable tray market is mature and evolving, with demand driven by industrial modernization, data centers, and smart building projects. Suppliers focus on value-added products with higher load ratings, corrosion resistance, and adaptability for future upgrades. This trend influences the pricing of cable tray supports, as higher-quality or specialized supports command higher prices.

In summary, when budgeting for cable tray supports in Belgium, expect €10–€150 per unit, with the final cost influenced by material, load capacity, type of support, and supplier selection.
