Price of cable tray configuration for computer room

Overview

Price List Cable Tray 2024 - Free download as PDF File (.pdf), Text File (.txt) or view presentation slides online.

Key Takeaways

Cable tray installation in a computer room typically costs between $10 and $50 per meter, depending on material, tray type, and labor complexity.

Material Costs

The cost of cable trays varies significantly by material: Steel trays: $5–$25 per meter, durable and cost-effective for indoor use. Aluminum trays: $6–$30 per meter, lightweight and corrosion-resistant, suitable for areas with higher humidity or chemical exposure. Stainless steel trays: Higher-end option, ideal for long-term durability and cleanroom-like environments.

Wire mesh trays: Affordable and lightweight, commonly used in data centers for network cables.

Installation and Labor

Labor costs depend on complexity, accessibility, and the need for supports, brackets, and connectors: Cable trays are generally quicker to install than conduit systems, reducing labor costs. Open designs allow easy cable placement, inspection, and future upgrades, which is particularly beneficial in computer rooms. Skilled labor rates vary by region, but installation typically adds $5–$20 per meter to the material cost.

Additional Considerations

Tray type: Ladder trays hold heavier power cables, while perforated or wire mesh trays are lighter and cheaper for network cabling. Room environment: Computer rooms require proper ventilation and dust management; open trays facilitate airflow and maintenance. Future-proofing: Modular trays allow easy addition of new cables without major disruptions, reducing long-term costs.

Accessories: Supports, brackets, connectors, and fasteners can add 10–20% to the total cost.

Typical Cost Range

For a standard computer room: Low-end: $10–$15 per meter (wire mesh or pre-galvanized steel, minimal supports)Mid-range: $20–$35 per meter (galvanized steel or aluminum, moderate supports)High-end: $40–$50+ per meter (stainless steel, heavy-duty supports, modular systems for future expansion) By considering material, labor, and accessories, you can plan a budget of $10–$50 per meter for cable tray installation in a computer room, with the exact cost depending on your specific requirements and local labor rates.
