8-core single-mode dual-wire optical cable

Overview

FIBERHOME Outdoor Optical Cable GYXTW-8B1.3 is a high-quality fiber optic cable designed for reliable aerial communication networks.

Key Takeaways

8-core single-mode dual-wire optical cables are available in various indoor and outdoor configurations, typically using OS1 or OS2 fibers with PVC, LSZH, or armored jackets for full-duplex communication.

Core and Fiber Type

An 8-core single-mode cable contains eight individual fibers, each capable of transmitting a single light mode, which minimizes signal dispersion and supports long-distance, high-bandwidth transmission. These fibers are usually OS1 or OS2: OS1: Tight-buffered, designed for indoor use, shorter distances (up to ~10 km), and supports speeds up to 10 Gbps. OS2: Loose-tube construction, suitable for outdoor or long-distance applications (up to ~40 km or more), supporting higher speeds and multiple wavelengths.

Duplex (Dual-Wire) ConfigurationA dual-wire or duplex cable has two fibers per communication channel—one for transmitting and one for receiving—allowing full-duplex communication. In an 8-core duplex cable, this typically means four duplex pairs, enabling four simultaneous bidirectional links. Jacket and Construction Types8-core single-mode cables come in different jacket materials and constructions depending on installation requirements: PVC (Polyvinyl Chloride): Standard indoor use, cost-effective, moderate fire resistance.

LSZ

H (Low Smoke Zero Halogen): Emits minimal smoke and no toxic gases, ideal for offices, hospitals, and enclosed spaces. Armored: Provides mechanical protection for harsh environments, suitable for outdoor or industrial installations. Plenum-rated (OFNP): High fire resistance for air-handling spaces like ceilings and ducts.

Applications8-core single-mode dual-wire cables are commonly used for: Indoor backbone networks in data centers and enterprise LANsTelecom and metro networks requiring multiple duplex linksFTTx deployments where multiple fibers are needed for high-speed connectionsIndustrial or outdoor installations when armored or weather-resistant jackets are used.

Summary

When selecting an 8-core single-mode dual-wire optical cable, consider: Fiber type: OS1 for indoor/short distances, OS2 for outdoor/long distancesDuplex configuration: Ensures full-duplex communicationJacket material: PVC, LSZH, armored, or plenum-rated depending on environmentApplication requirements: Indoor, outdoor, industrial, or high-speed telecom networks These options provide flexibility for both short-range and long-range high-bandwidth optical communication systems.

FIBERHOME Outdoor Optical Cable GYXTW-8B1.3 | 8 Core Single

FIBERHOME Outdoor Optical Cable GYXTW-8B1.3 is a high-quality fiber optic cable designed for reliable aerial communication networks. Featuring 8 single-mode fibers with a stranded loose tube

OS2 Single Mode Fiber Optic Cables, SMF Duplex Cables

Get OS2 single mode duplex fiber patch cables for 1G/10G/40G/100G/400G Ethernet fiber connections to transport data up to 10km at 1310nm and 40km at 1550nm.

The difference between the 8 -core optical cable and

Two popular types of optical fiber cables are 8-core optical cable and 12-core single-mode indoor fiber optic cable. In this article, we will discuss the

8 Core GYXTW Fiber Optic Cable Unitube Light-armored cable

Overview: The 8 Core GYXTW Fiber Optic Cable is a compact, light-weight, and durable outdoor communication cable designed for direct burial, duct, and aerial installations.

Fibre Optic Cable

© 2026 CJC FIBRE CONSULTANTS - All rights reserved

Single-mode optical fibre is suitable for data transmission over long distances (>100km) and it tends to be used for cable TV, internet, and telephone signals. Single-mode fibres have a very thin core of c.8

Fiber Optic Cable

Offered dry or gel-filled these cables are ideal for indoor, outdoor and industrial applications, including conduit, direct burial, lashed aerial and more.

Fiber Optic Cable Assemblies | Fiber Patch Cords and Fiber ...

Corning offers the most complete line of connectors and factory-terminated cables, from single-fiber patch cords to high-fiber-count assemblies.

Fiber Optic Cables

CommScope designs and manufactures a comprehensive line of fiber optic cables—from outside plant to indoor/outdoor and fire-rated indoor fiber cables.
