Rwanda Durable Cable Tray Specifications

Overview

Wire mesh is made from sturdy Cable Tray, metal wires woven or welded together, making it highly resistant to impact and deformation.

Key Takeaways

Cable trays in Rwanda are available in various types, materials, and sizes, designed to meet international safety standards and support efficient cable management.

Types of Cable Trays

In Rwanda, the main types of cable trays include: Ladder Cable Trays: Ideal for heavy-duty cables, providing excellent support and ventilation for heat dissipation. Perforated Cable Trays: Feature holes for improved airflow, reducing overheating and ensuring optimal cable performance. Trough Cable Trays: Solid or partially perforated, suitable for medium-duty applications.

Solid Sheet Cable Trays (e.g., P31 range): Provide full protection against dust and environmental hazards, available in solid or perforated metal.

Materials

Cable trays in Rwanda are manufactured from durable materials to withstand harsh environments: Galvanized Steel: Offers corrosion resistance and long-term durability. Stainless Steel: Suitable for high-corrosion or industrial environments. Fiberglass Reinforced Plastic (FRP): Lightweight, corrosion-resistant, and ideal for chemical or outdoor applications.

Aluminum: Used in ladder trays for lightweight and strong support.

Sizes and Configurations

Cable trays come in various widths, depths, and lengths to accommodate different cable volumes and layouts. Configurations include: Straight sections, bends (15°/30°/45°/90°), tees, junctions, and end pieces. Adjustable bends and risers for flexible routing.

Customizable lengths and fittings to suit specific project requirements.

Installation and Support

Mounting Options: Wall brackets, ceiling brackets, trapeze systems, and strut rails. Interlocking Systems: Male/female couplers for easy alignment and secure connections. Ease of Maintenance: Open designs allow easy cable installation, inspection, and replacement.

Standards and Safety

Cable trays in Rwanda comply with IEC 61537 and are certified for fire resistance (E 30/E 90 according to DIN 4102-12) in some ranges. Designed to segregate cables from other building elements, minimizing electrical hazards and fire risks. Corrosion-resistant coatings and robust construction ensure long-term safety and reliability.

Applications

Industrial, commercial, and construction projects. Electrical, telecommunications, and data cabling systems. Environments requiring high durability, heat dissipation, and organized cable management.

Rwandan suppliers such as Brilltech Engineers, Jeetmull Jaichandlall, and Legrand Rwanda provide a wide range of cable trays with customization options, ensuring compliance with international standards and project-specific requirements.
