Aebds distribution box

Overview

Read page 1 of our customer reviews for more information on the Advanced Drainage Systems ADS Distribution Box.

Key Takeaways

The AEBDS distribution box is a high-density polyethylene (HDPE) septic distribution box designed to evenly distribute effluent from a septic tank into multiple drain or sewer pipes.

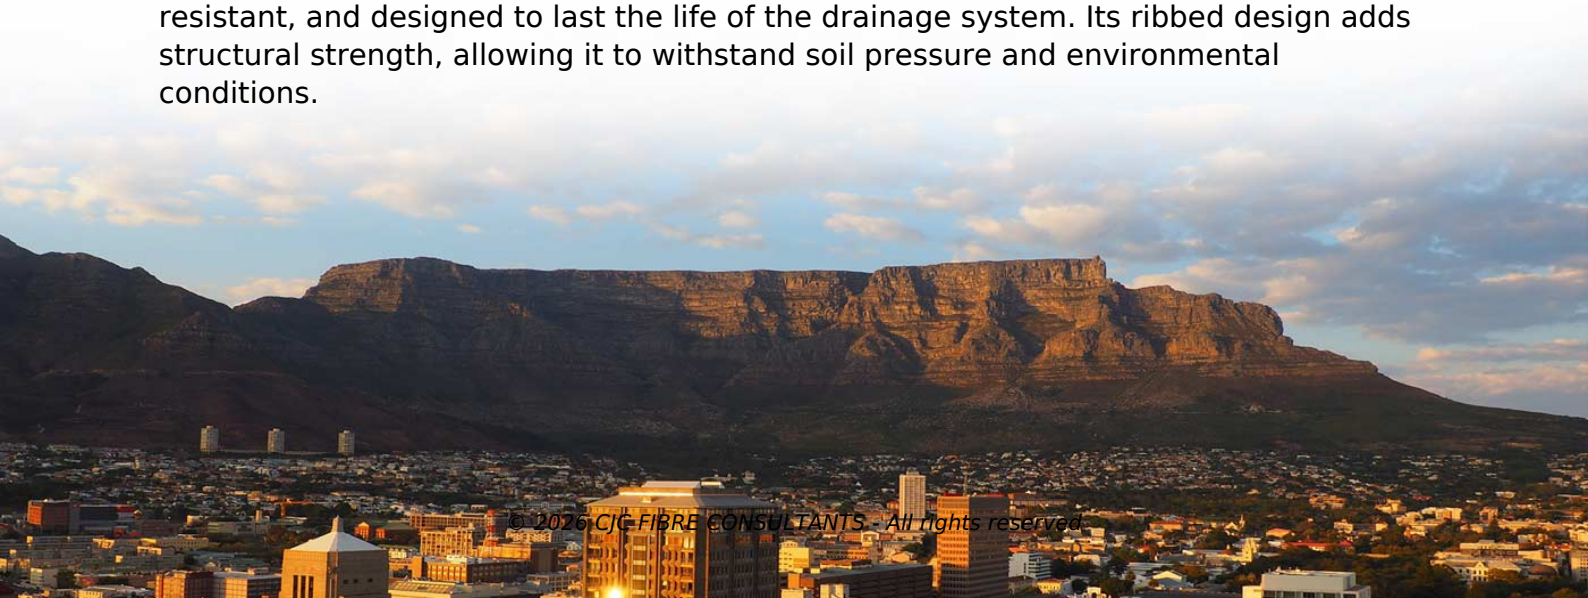

Overview and Function

The AD

S distribution box, such as the 1369AB model, is used in septic systems to direct effluent from the septic tank into the leach field or absorption area. It ensures even gravity flow to multiple drain lines, preventing overloading of any single pipe and promoting efficient wastewater treatment in the soil.

Material and Durability

The box is made of high-density polyethylene (HDPE), which is durable, corrosion-resistant, and designed to last the life of the drainage system. Its ribbed design adds structural strength, allowing it to withstand soil pressure and environmental conditions.

Dimensions and Design

Height: 9. 5 inchesWidth: 24 inchesLength: 25. 75 inchesWeight: 4.

4 poundsFeatures: Multiple outlet holes for flexible pipe configurations, an inspection port for easy maintenance, and a heavily ribbed structure for durability.

Installation and Compatibility

The distribution box is relatively easy to install once the original box is removed. It supports various tubing configurations for single absorption field designs. The inlet and outlet sizes are typically 4–5 inches, so proper fittings or adapters may be required to connect to existing pipes.

The top inspection port allows for maintenance and monitoring of effluent flow.

Advantages

Even distribution of effluent to prevent drain field overloadingLong-lasting HDPE constructionMultiple outlet options for flexible system designInspection port for easy maintenance The ADS distribution box is widely used in residential and commercial septic systems and is compatible with standard corrugated HDPE drain pipes.
