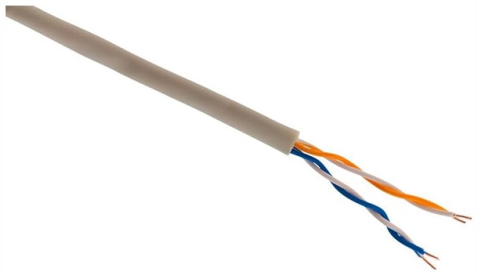
Cable Management for Slotted Core Switches



Overview

Match plug types to device inrush: C14 for ≤ 10 A, C20 for 16 A switch clusters, lockable IEC for anything mission-critical. Power at rear, data at front. Crossing planes invite inductive coupling that can inject 50 Hz hum into analogue control cards. These cables handle critical circuits that must stay up and running. Any mishandl nd switching installations provide higher and higher levels of performance and capacity. But with this growth of capability come a parallel growth of discrete data communications and power c bling. Network cable management encompasses the tools, techniques, and infrastructure used to organize, protect, and route network cables (e., Ethernet, fiber optic, coaxial). At its core, it aims to: Minimize cable tangling, kinking, and wear.
