Cable tray fire-fighting pillow

Overview

Designed for use in through-penetration firestops, such as cable trays, conduit and blank openings, 3M™ Fire Barrier Pillows are self-contained, intumescent products that expand and lock into place during a fire. This helps prevent the spread of smoke, fire and toxic gases. Firestop tested for up to 3 hours of protection in accordance with ASTM E 814 (UL 1479) Expands to form a hard char that tightly seals against flame spread, smoke and toxic gases Re-enterable and re-useable for new or retrofit installations For industrial/occupational use only. Not for consumer. Expanding intumescent pillows to seal voids around metal or plastic cable trays A reinforced, glass cloth intumescent cable tray pillow, filled with a fireproof sponge as well as intumescent. Expands to 3 times its original size when exposed to fire, filling gaps in or around cable trays in. The market for fire pillows, a critical component of passive fire protection systems for cable tray penetrations, is experiencing significant transformation. Supplying fire stopping products nationwide.
