Cable tray high-voltage Belgian branch

Overview

The 10kV high-voltage European cable branching box is designed for branching connections of cross-linked polyethylene insulated power cables, suitable for rated voltages of 12kV/24kV and nominal sections of 25~500mm². Trayco is specialised in producing and optimising 100% Belgian cable trays, mesh trays, cable ladders, mounting and floor systems. We also play an important role as advisor and guide during the installation process. They are typically made of metal, such as steel or aluminum, and are designed to provide a safe and efficient way to route and protect. A compact, fully insulated, and high-performance European-style cable branch box designed for 12kV, 24kV, and 35kV power distribution. Engineered by Green Origin Electrical, this maintenance-free solution features a bolt-on connection system, full sealing for harsh environments, and ISO-certified. These are cable management systems composed of trays, mounting support systems, direction changing parts, connection parts and fittings with the purpose of carrying and fixing cables safely in the electrical installations.
