Cable tray support screw size and specifications

Overview

Galvanic corrosion must be taken into account within the whole cable management system and makes it essential to choose the right supports, accessories (coupling, screws, equipotential bonding, etc).

Key Takeaways

Cable tray support screws typically range from M6 to M10, depending on the tray type, load, and manufacturer specifications.

Standard Screw Sizes

Cable tray systems, especially screw-on types, use screws that match the connector holes of the tray and fittings. Common sizes include: M6 screws: Often used for lighter-duty trays or smaller widths (100–200 mm) and lower load applications. M8 screws: Standard for medium-duty trays, widths 200–400 mm, supporting moderate cable loads.

M10 screws: Used for heavy-duty trays, wider trays (400–600 mm), or high-load installations. The screw length is selected to ensure proper engagement with the tray and any supporting brackets, typically 20–50 mm longer than the combined thickness of the tray and bracket.

Considerations for Selection

Tray Type: Perforated, solid-bottom, ladder, or wire mesh trays may require different screw lengths or head types to ensure secure fastening. Load Requirements: Heavier cable loads or longer spans may require larger diameter screws (M8–M10) to maintain structural integrity. Material and Corrosion Protection: Stainless steel or zinc-plated screws are recommended for outdoor or corrosive environments.

Standards Compliance: Screws should comply with IEC 61537 and local electrical installation codes to ensure safety and reliability.

Installation Tips

Always use matching nuts and washers to distribute load and prevent loosening. Ensure screws are tightened to the manufacturer's recommended torque to avoid damage to the tray or fittings. For adjustable or universal brackets, verify that the screw size matches the bracket's pre-drilled holes.

By selecting the correct screw size based on tray width, load, and environmental conditions, you ensure a safe, durable, and code-compliant cable tray installation.
