

# Cisco Aggregation Switch 3750

## Overview

The Cisco® Catalyst® 3750 Series Switches (Figures 1 through 4) are innovative switches that improve LAN operating efficiency by combining industry-leading ease of use and high resiliency for stackable switches. This product series features Cisco StackWise™ technology, a 32-Gbps stack interconnect. Page 2 Cisco StackWise technology unites up to nine individual Cisco Catalyst 3750 switches into a single logical unit, using special stack interconnect cables and stacking software. The stack behaves as a single switching unit that is managed by a master switch elected from one of the member. Would you like to learn how to configure Link aggregation on Cisco Switch using the command-line?

In this tutorial, we are going to show you all the steps required to configure a link aggregation on a Cisco Switch 2960 or 3750 using the command-line. These switches provide high availability, scalability, security, energy efficiency, and ease of operation with innovative features such as Cisco StackPower™, four optional network modules, redundant power supplies, and Media Access the appearance of WS-C3750X-12.
