Distribution box shell plastic

Overview

Made from thermoplastic materials like polycarbonate, ABS, or PVC, plastic enclosures are lightweight and electrically non-conductive, making them ideal for low-risk environments. Best for: Residential wiring, indoor commercial setups, control panels, and low-voltage. IP66 plastic distribution box SHPN series has streamlined design, compact structure, easy installation, impact resistance, oxidation resistance, protection level up to IP66. Distribution box is carefully built for long service life. The use of heavy-duty, UV-resistant engineered plastic materials. This product features a shell made of high-quality PS, ABS, or flame-retardant materials (optional), ensuring durability and safety. It has a protection level of IP40, providing basic dust-proof performance while maintaining reliable operation. Parameter: 24-hour maximum ambient temperature: 35℃ Ambient temperature: -5°C to +40°C Relative humidity: ≤ 50% at 40°C, ≤ 100% at 25°C Rated voltage: Un=400V. is made of ABS engineering plastic. There are wall-mounted installation (surface mounted box) and wall-embedded (co cealed box) installat +25°C of the wettest mo□Insulation Design□The entire shell of the plastic junction distribution box is insulated design, and the surface is a transparent gray cover. You can observe the switch status without opening the switch.
