Dual-core fiber optic pigtails sold directly from the source

Overview

FS fiber optic pigtails offer a fast way to make fiber optic communication devices in the field by fiber splicing, fully manufactured and tested by industrial standards.

Key Takeaways

Dual-core fiber optic pigtails are available directly from manufacturers and distributors like Leviton, FS, EFB-Elektronik, AmeriFiber, and Unisol, offering single-mode and multimode options with various connector types.

Key Sources and Options

Leviton provides fiber optic pigtail kits suitable for mechanical or fusion splicing, available in single-mode and multimode fibers with SC, ST, or LC connectors. They offer premium pigtails with low insertion loss and custom lengths, as well as economy options with same-day shipping for orders placed before noon Pacific Time.

F

S offers fully manufactured and tested fiber optic pigtails for field splicing, ensuring industrial-standard performance. Their products are designed for quick deployment in fiber optic communication devices. EFB-Elektronik sells fiber pigtails directly from stock, including SC, LC, ST, and MTP/MPO connectors.

They also provide custom solutions and assembly services, making them suitable for high-volume or specialized network installations.

Ameri

Fiber specializes in multi-strand fiber optic pigtails, including dual-core configurations. They offer both single-mode and multimode options with LC, SC, ST, FC, MU, and MPO connectors, supporting UPC or APC ferrules. Their pigtails are designed for high-volume applications, telecom signaling, and industrial device controls, providing flexibility and reduced cabling footprint.

Unisol manufactures high-performance fiber optic pigtails with pre-terminated connectors on one end and stripped fiber on the other, ideal for fusion or mechanical splicing. They offer single-mode and multimode variants with LC, SC, FC, and ST connectors, ensuring low insertion loss, high return loss, and long-term reliability for enterprise LANs, metro networks, and FTTH applications.

Considerations When Purchasing

Connector Type: Choose based on your network equipment (LC, SC, ST, FC, MU, MPO). Fiber Type: Single-mode for long-distance, multimode for short-distance high-volume transfers. Strand Count: Dual-core or multi-strand pigtails allow multiple fibers in a single jacket, reducing installation complexity.

Splicing Method: Ensure compatibility with mechanical or fusion splicing requirements. Quality Metrics: Look for low insertion loss, low return loss, and durable ferrules for consistent performance. By sourcing directly from these manufacturers or distributors, you can obtain high-quality dual-core fiber optic pigtails with customization options, reliable performance, and support for large-scale network deployments.
