Electricity score

Overview

The getting electricity indicators measured the procedures, time and cost required for a business to obtain a permanent electricity connection for a newly constructed warehouse.

Key Takeaways

Electricity scores measure energy efficiency or access, ranging from building and home ratings to national and AI energy performance indicators.

Building Energy Efficiency Scores

In New York City, buildings are assigned an energy efficiency score using the Energy Star Portfolio Manager, which benchmarks energy use against similar buildings in similar climates. Scores are converted into letter grades: A (≥85), B (70–84), C (55–69), D (
