Fiber Optic Cable Purchase

Overview

Purchase fiber optic cables, matching plugs and couplings, adapters, and cable management solutions all in one place.

Key Takeaways

You can purchase fiber optic cables online from suppliers offering singlemode, multimode, bulk, and custom-length options for both indoor and outdoor installations.

Types of Fiber Optic Cables

Singlemode Fiber: Has a small core (typically 9 microns) and is ideal for long-distance, high-speed data transmission. Multimode Fiber: Larger core (50/125 or 62. 5/125 microns), suitable for shorter distances and less demanding networks.

Strand Counts: Available in 2, 6, 12, 24, 48, 72, or 96 strands depending on network complexity and data center requirements.

Cable Configurations and Jackets

Indoor, Indoor/Outdoor, Outdoor OSP Gel-Filled, Interlocking Armor, MicroArmor®, Aerial: Each jacket type is designed for specific environments, from office setups to harsh outdoor conditions. Custom Lengths: Many suppliers offer cutting to exact lengths and can add pulling eyes for easier installation. Where to BuyCableWholesale: Offers bulk fiber optic cables, connectors, converters, and accessories at wholesale prices, suitable for long-distance or enterprise networks.

LA

Nshack: Provides fiber optic cables by the foot, including OM1, OM3, OM4, OM5, and singlemode types, with options for custom lengths and strand counts.

Cables Plus US

A: Specializes in high-density, high-performance fiber optic cables, including armored outside plant (OSP) cables, priced per foot for bulk orders. Retail Options: Walmart and Amazon offer fiber optic internet cables for home or office use, including patch cables compatible with major providers.

Accessories and Installation Tools

Connectors, Converters, Dust Caps, Network Couplers: Essential for connecting and protecting fiber networks.

High-

Density Solutions: Useful for optimizing space in data centers and simplifying cable management.

Tips for Purchase

Determine Distance and Speed Requirements: Choose singlemode for long distances and multimode for shorter runs. Select Appropriate Strand Count: Match the number of strands to your network complexity. Consider Environment: Indoor vs outdoor, armored vs non-armored, and gel-filled for moisture protection.

Check for Custom Options: Custom lengths and pre-installed pulling eyes can simplify installation and reduce waste. By evaluating your network needs and selecting the right type, strand count, and jacket, you can purchase fiber optic cables that ensure reliable, high-speed connectivity for your project.
