Fiber Optic Patch Cord Warranty

Overview

b) Indoor and outdoor fiber optic patch cords, we promise that the goods will be tested and provided with test reports before leaving the factory, providing a 20-year warranty period.

Key Takeaways

Fiber optic patch cords typically have a warranty period of 1 to 20 years, depending on the manufacturer and product type.

Manufacturer Warranty Overview

Bonelinks provides a 20-year warranty on indoor and outdoor fiber optic patch cords, ensuring the products are tested and meet quality standards before leaving the factory. Siemon offers a 1-year repair or replace warranty specifically for ValuLight Fiber Patch Cords, while other high-end cabling systems may have warranties up to 20–25 years when installed in certified systems by qualified installers. Panduit provides a Certification Plus System Warranty covering fiber connectivity hardware and cables for 15, 20, or 25 years, depending on the registered system and compliance with program requirements.

Key Considerations

Warranty coverage generally includes defects in material and workmanship under normal handling and use. Damage caused by external factors or improper use is typically excluded. Some manufacturers require returning a sample for failure analysis to validate warranty claims, with costs for shipping and testing handled according to the cause of failure.

The warranty period can serve as a guideline for the expected lifespan of the patch cords. Users are advised to monitor cords for wear and consider proactive replacement as they approach the end of the warranty period.

Practical Advice

When selecting fiber optic patch cords, consider both the warranty period and the quality of the product, as longer warranties often indicate higher reliability and lower long-term maintenance costs. Ensure proper installation and handling to maintain warranty validity, and keep documentation such as purchase receipts and test reports for potential claims. In summary, fiber optic patch cord warranties vary widely, from 1 year for basic cords to 20 years or more for premium or certified systems, with coverage typically including defects in materials and workmanship under normal use.
