Fiber optic jumper cable is sturdy and not easily broken

Overview

Armored optical fiber jumper has the characteristics of high strength, tensile strength, compression resistance, rat bite resistance, and is not easily damaged by trampling. The armored jumper can be laid directly outdoors and in various harsh environments without using a. Fiber jumper cables, called fiber patch cords, are also short optical fibers equipped with connectors at both ends. These cables link the end devices to a network or join the network components in a fiber optic configuration. While the glass fibers inside are fragile, modern fiber cables are engineered to withstand crushing forces, extreme temperatures, and even rodent attacks—making them vital for. Armored optical fiber jumper refers to adding a layer of micro-caliber stainless steel sheath tube to the optical fiber, and then wrapping the bare optical fiber with a layer of aramid yarn and helical stainless steel armor. Choosing the right one is essential for a. Ceramic connectors ensure low signal loss, and high reliability,All our products are 100% new fiber optic cable of carrier-class quality,and 100% test before delivery.
