Electric Meter Box Pricing

Residential electric meter boxes generally cost $600–$2,000, with most homeowners paying $1,000–$1,400 for standard 200A-rated, outdoor-weatherproof units. Key factors affecting cost include: Type and size: Recessed, surface-mounted, or pole-mounted units; larger or commercial-grade boxes cost more. Material: Plastic boxes are cheaper (£40–£100), while metal boxes offer better durability and weather resistance (£150–£300),.

P rating: Higher ingress protection (IP55–IP65) increases price but ensures long-term reliability. Installation: Labor typically ranges from $75–$120 per hour, with 2–6 hours for standard residential installation. Permits and inspections: Local code compliance and inspection fees can add to the total cost.

For industrial or custom enclosures, prices can rise to $5,000–$12,000+ depending on specifications and site conditions.

Modern distribution boxes may include surge protection, arc fault detection, and energy monitoring, which can increase upfront costs but reduce long-term maintenance expenses.

Summary

For a typical household: Electric meter box: $600–$2,000 (standard residential), higher for outdoor/weatherproof or commercial units. Distribution box: $1,200–$6,000 for standard residential upgrades, higher for advanced or outdoor systems. Additional costs may include permits, inspections, labor, and any structural modifications.
