How big of a wireless router should I choose for a 2om fiber optic connection

Overview

The best router for fiber internet is one that matches your plan speed, home size, and how you use your connection. Our top overall pick is the Netgear Nighthawk RS700S, a Wi-Fi 7 router built for multi-gig fiber plans that handles up to 200 devices across 3,500 square feet. Many major ISPs, such as Verizon and Xfinity, offer fiber connections directly to your door, known as FttP or Fiber. However, you need a router capable of supporting multi-gig speeds to get fiber internet connectivity. I worked with the Cybernews research team to review and compare different routers and give. This guide focuses exclusively on routers designed to handle the unique demands of a fiber connection, from the ONT handoff to the final wireless hop. I'm Ayan — the founder and writer behind Home To Sight. Router sizes vary to fit different home layouts and needs.
