How much does a single large pigtail cost

Overview

Get a full cost breakdown for pigtailing aluminum wiring. We detail approved methods, necessary materials, and total project variables.

Key Takeaways

A single large electrical pigtail typically costs between $2 and $5 for materials, with labor adding $25–$150 per connection depending on complexity and region.

Electrical Pigtails

For aluminum or copper wiring, the cost of a single pigtail depends on the wire gauge, connector type, and installation labor. Material costs for a copper pigtail are generally $2–$5 per unit, while specialized connectors like AlumiConn or Copalum may increase the price slightly. Labor for installation can range from $25 to $150 per hour, with each pigtail taking roughly 10–20 minutes to install, depending on accessibility and the number of outlets or switches involved.

Regional labor rates, permit fees, and inspection requirements can further influence the total cost. For example, in a standard residential setting, a single pigtail installation may cost $30–$50 including materials and labor, but this can rise in complex or high-density wiring scenarios.

Fiber Optic Pigtails

If the pigtail is for fiber optic applications, prices vary based on fiber type (single-mode or multi-mode), connector type, and length. Fiber optic pigtails are pre-manufactured and tested, and a single unit can cost anywhere from $5 to $20 or more, depending on specifications and vendor. Bulk purchases often reduce the per-unit cost.

Ground Pigtails

For grounding purposes, insulated copper ground pigtails are sold in packages, but the per-unit cost is typically under $1–$2 for standard 12 AWG or 10 AWG leads, excluding labor. Installation costs are similar to other electrical pigtails, depending on accessibility and code requirements. SummaryCopper/aluminum electrical pigtail: $2–$5 material, $25–$150 labor per unitFiber optic pigtail: $5–$20+ per unitGrounding pigtail: $1–$2 per unit, labor extra The final cost depends on type, size, installation complexity, and regional labor rates.

For a single large pigtail in a typical home, expect $30–$50 for electrical wiring or $5–$20 for fiber optic applications.
