How much does a vertical cable tray cost in Portugal

Overview

Cable Tray | Catalogue | GroupSumIn our catalogue, you can easily compare the cable trays that suit your needs and budget. We offer affordable and durable.

Key Takeaways

Vertical cable trays in Portugal typically cost between €20 and €150 per meter, depending on material, type, and installation requirements.

Price Factors

The cost of a vertical cable tray depends on several factors: Material: Pre-galvanized steel is the most affordable, hot-dip galvanized steel is more durable and slightly more expensive, aluminum is lightweight but higher in cost, and stainless steel is the most expensive, suitable for corrosive or hygienic environments. Type: Ladder-type trays are common and generally cost less than perforated or solid-bottom trays. Vertical trays may also include fittings and supports, which add to the total cost.

Length and Size: Standard lengths are usually around 2. 4 meters, and larger widths or higher load capacities increase the price. Installation Complexity: Vertical installations may require additional brackets, supports, or labor, which can increase the overall project cost.

Estimated Price RangePre-galvanized steel: €20–€40 per meterHot-dip galvanized steel: €35–€70 per meterAluminum: €50–€100 per meterStainless steel: €100–€150 per meter These prices are indicative and may vary depending on the supplier, quantity, and specific project requirements.

Additional Considerations

Many suppliers in Portugal, such as GroupSumi and local manufacturers, offer customized solutions and can provide quotes based on your exact vertical tray specifications. Buying in bulk or including fittings and accessories in the order may reduce the per-meter cost. Vertical cable trays are generally cost-effective compared to conduit systems due to faster installation and lower labor costs.

For precise pricing, it is recommended to contact local suppliers with your project specifications to get a detailed quote.
