How to slope a parallel cable tray

Overview

If the cable tray is moved instead of being sloping when using the align option, edit the Start or End Elevation of the cable tray to make it sloping. Was this information helpful?

Need help?

Ask the. The Cable Tray Slope & Fabrication Calculator is a field-ready tool for electrical construction workers who need to quickly calculate V-cut dimensions, bolt hole positions, slope length, and hanger spacing for inclined cable tray installations. Use the align option to adjust the cable tray exactly with the. Slope is applied to cable tray in the Z direction of the current coordinate system in the drawing (typically the vertical direction for a building plan). In the Electrical workspace, click Manage tabPreferences panelCable Tray. A rung spacing of 6 to 9 inches (150 to 230 mm) is preferable when the cable tray cont d for instrumentation and control applications that require.
