Introduction to the 40km Optical Module

Overview

SFP+ 40km is a type of 10 Gigabit optical transceiver designed for long-distance data transmission up to 40 kilometers over single-mode fiber (SMF). In most cases, this term specifically refers to the 10GBASE-ER (Extended-Reach) standard defined by the IEEE for 10G Ethernet networks. These modules typically operate at a 1550 nm wavelength, use LC duplex connectors, and support Digital Optical Monitoring (DOM/DDM) for. In modern optical transport networks, 100G optical modules with a transmission distance of 40km have emerged as a core technology to meet the needs of carriers' backbone networks, large enterprises, and cloud service providers. It can be applied for 100G direct connection and interconnection in enterprise networks and data centers.

Article Content

SFP+ 40km (10GBASE-ER): Extended-Reach Optical Module Guide

Understand SFP+ 40km (10GBASE-ER) modules, including specs, SMF compatibility, and how to choose the right extended-reach optical transceiver for your network.

Extend Your 100G Reach to 40km Transmission with FS Optics

In this article, we will provide a detailed overview of these different types of 40km 100G modules, analyzing their unique features and application scenarios to help you choose the most

40km line optical module

© 2026 CJC FIBRE CONSULTANTS - All rights reserved

In modern optical transport networks, 100G optical modules with a transmission distance of 40km have emerged as a core technology to meet the needs of carriers'' backbone networks, large enterprises,

40GBASE-ER4 QSFP+ Guide: Specs, Wavelengths, 40km Optics

40GBASE-ER4 is a long-reach 40GbE optical interface standard that uses four CWDM wavelengths over single-mode fiber to support transmission distances up to 40km. It is defined under IEEE

QSFP28 ER4 Optical Transceiver Overview

Now, this post will introduce the module with a 40km transmission distance——100GBASE ER4, from the perspectives of definition, working principle, applications, and

Exploring the Working Principle of a 10G DWDM 40km SFP+ Tunable

What is a 10G DWDM 40km SFP+ tunable optical module? Simply put, 10G DWDM 40km SFP+ Tunable Optical Module It is an optical module capable of transmitting data at 10 Gbps using

10GBASE-ER SFP+ 40km 1550nm | EDGE Optical

The 10G-SFP-40 is a 10GBASE-ER SFP+ module that extends 10 Gigabit Ethernet up to 40 km over single-mode fiber at 1550 nm.

A Deep Dive into the Industry Applications of 10G DWDM 40km SFP+ ...

What is a 10G DWDM 40km SFP+ tunable optical module? Simply put, this is an optical module that supports wavelength-division multiplexing technology and can transmit data at a rate of 10 Gbps over

40G QSFP+ Optical Transceivers Complete Guide | Fibrecross

How 40G QSFP+ optical transceivers boost performance in data centers and telecom networks. Learn about types, use cases, and cost-saving benefits.

100G QSFP28 ER4 Transceiver: 40km Reach Optical Solution

Innoptical''s IN-QSFP28-ER4 module is designed for 40km optical communication applications. This module contains 4-lane optical transmitter, 4-lane optical receiver and module management block

New & Used optical transceiver modules

General Introduction: This product is a transceiver module designed for 40km optical communication applications. The design is compliant to 40GBASE-ER4 of the IEEE 802.3ba standard.

A Comprehensive Look at the QSFP28-100G-ZR4 Optical Module

Introduction to the QSFP28-100G-ZR4 Module Network operators use QSFP28-100G-ZR4 optical transceiver s to deliver 100GbE connectivity across extended Single-mode fiber links with

100G QSFP28 ER4 40KM LC Optical Transceiver (EML)

100G QSFP28 ER4 LC optical transceiver delivers reliable 100GbE transmission up to 40km on single-mode fiber, compliant with IEEE 802.3ba standards. This hot-pluggable module features low power

Introduction to 400G Optical Modules · KAD

A clear, engineer-friendly overview of 400G optical modules, including standards, packaging formats, functions, and market outlook for next-generation data centers.

Cisco Command to Check SFP Module Details

Introduction - Why Checking SFP Status Matters In every enterprise network, Small Form-factor Pluggable (SFP) modules play a critical role. They connect switches, routers, and servers

Nvidia Unveils Silicon Photonics Cpo Technology For Ai Data Centers ...

Conclusion NVIDIA''s introduction of 1.6Tb/s silicon photonics CPO switches marks a pivotal step in data center networking evolution. CPO technology promises to reduce power

Understanding Fiber Optic Pigtails: Types and

Characterized by having an optical fiber connector on one end and a bare fiber end on the other, they are primarily used to connect optical

The Ultimate Guide to SFP Modules (2026): Types,

Confused by SFP vs SFP+? Read the definitive 2026 guide on SFP modules. We explain Single Mode vs Multimode, DDM diagnostics, and how to choose the
