

Italian fiber optic cable severed

Overview

November 19, 2024 - Two undersea fibre-optic communications cables in the Baltic Sea, including one linking Finland and Germany, have been severed, sparking alarm of sabotage by bad actors. The 2026 Italian rail sabotage was a series of coordinated strikes against Italy's national railway infrastructure on February 7, 2026. The incidents occurred on the first full day of the 2026 Winter Olympics (Milano Cortina 2026) and primarily targeted the critical rail corridor near the. On 17-18 November 2024, two submarine telecommunication cables, the BCS East-West Interlink and C-Lion1 fibre-optic cables, were disrupted in the Baltic Sea. It manufactures traditional electrical and fibre optic cables for energy, telecommunications, and other applications, as well as innovative cables, such as superconductors used in projects like Fusion For Energy and CERN in Geneva, or special cables.

2024 Baltic Sea submarine cable disruptions

OverviewBackgroundDisruptions from 18 November 2024ReactionsSuspicious shipsInvestigationsSee also

On 17-18 November 2024, two submarine telecommunication cables, the BCS East-West Interlink and C-Lion1 fibre-optic cables, were disrupted in the Baltic Sea. The incidents involving both cables occurred in close proximity to each other and near-simultaneously, which prompted accusations from European government officials and NATO member states of hybrid warfare and sabotage as the cause of the damage. Currently, the damage to those undersea cables has not been conclusively attributed to any specific p
