Kuwait Fire Cable Tray Specifications

Overview

Our cable trays meet stringent Fire retardant requirements. Our cable support systems are available in two types- Ladder cable tray and perforated cable tray.

Key Takeaways

Fire-rated cable trays in Kuwait are available in FRP/GRP and metallic types, with standardized widths, heights, thicknesses, and accessories to meet fire safety and corrosion resistance requirements. Types of Cable TraysFRP/GRP Fire-Resistant Cable TraysMade from glass-reinforced thermoset resins with fire-retardant properties. Types: Ladder cable tray and perforated cable tray.

Advantages: anti-corrosion, high strength, electrical insulation, UV resistant, low thermal conductivity, and easy installation. Accessories: FRP coupler plates, expansion plates, angle plates, adjustable splice plates, hold-down clips, cover clamps, trefoil clamps, cable ties, blind plates, divider strips, and SS fish plates. Standards: IS 6746-1994, NEMA FG-1, UL 94 Flame Retardant (V0) for low flammability.

Metallic Cable Trays

Materials: Hot-dip galvanized steel (BS729), stainless steel marine grade 312S31, pre-galvanized steel (BS2989), epoxy powder-coated steel. Types: Light-duty trays (without return flange) and trays with return flange. Standard thickness: 1.

6 mm for widths up to 300 mm, 2. 0 mm for widths above 300 mm. Standard height: 50 mm.

Standard lengths: 2. 44 m or 3 m. Widths: 50 mm to 900 mm, with custom widths available on request.

Dimensions and DiagramsFRP/GRP trays: Available in various widths and heights depending on project requirements; typically supplied with bends, tees, crosses, reducers, and covers. Covers are compatible with circular, rectangular, or square trays and are lightweight, chemical-resistant, and weather-resistant. Metallic trays: Standardized dimensions ensure ease of handling, shipment, and installation.

Covers for perforated or solid trays are 10 mm wider than the tray width to allow proper fitting.

Accessories and Fittings

Bends, Tees, Crosses, Reducers: For routing cables in complex layouts. Covers and Cover Fittings: Access hatches, inspection hatches, ladders, handrails, and walkways can be incorporated. Support Systems: FRP, GRP, and metallic supports are available to maintain load-bearing capacity and stability.

Summary

In Kuwait, fire-rated cable trays are designed to meet stringent fire safety standards while providing durability, corrosion resistance, and flexibility for industrial and commercial installations. Both FRP/GRP and metallic trays are available in standardized widths, heights, and thicknesses, with a wide range of accessories and fittings to accommodate complex cable management layouts. For detailed diagrams and project-specific dimensions, manufacturers like Alnafaa Group, Sahara, and Almeer Industries provide technical catalogs and PDF guides.
