Laos Imported Core Switch 1G

Overview

Volza''s Laos import data of Switch Parts is sourced and complied from Global import export shipments across 203 Countries.

Key Takeaways

Laos has access to a range of imported 1G core switches suitable for enterprise, industrial, and specialized applications, with suppliers offering both managed and unmanaged options.

Product Options

Enterprise 1G Switches: Edgecore Networks offers high-performance Gigabit Ethernet access switches, including the AS4600 series with 30–54 ports and PoE support up to 90W. These switches provide full line-rate L2/L3 functionality, suitable for campus networks, enterprise environments, and Wi-Fi device connectivity. Models like the AS4625-30P and AS4625-54P feature 24–48 x 1G RJ45 PoE ports and additional 1G/10G uplink ports, making them ideal for management and access layers in enterprise networks.

Industrial and Embedded Switch I

P Cores: MES and Comcores provide 10M/100M/1G managed Ethernet switch IP cores for FPGA or embedded applications. These switches support configurable layer-2 features, redundancy protocols (DLR, MRP), and multiple PHY interfaces (MII, RMII, GMII, RGMII, SGMII, QSGMII) with high-performance 1G throughput. Comcores' compact Ethernet TSN switches also support IEEE TSN standards, VLAN 802.

1Q, multicast, MAC learning, and timing synchronization, suitable for automotive, avionics, and industrial automation.

Suppliers and Import Options in Laos

Local Importers and Distributors: Volza lists 126 verified electrical and switch suppliers exporting to Laos, including manufacturers of wall-mounted switches, PoE devices, and industrial control switches. Trade Platforms: Trademo provides access to Laos-based switch manufacturers and suppliers, offering shipment data, trade volumes, and global exporter insights for sourcing imported 1G switches.

Key Considerations

Port Configuration: Choose switches with sufficient 1G ports and uplinks for your network topology.

Po

E Support: For powering devices like IP cameras or Wi-Fi access points, PoE-enabled switches are recommended. Managed vs Unmanaged: Managed switches provide VLAN, QoS, redundancy, and monitoring features, essential for enterprise or industrial networks. Industrial Standards: For harsh environments, consider TSN-compliant or ruggedized switches with redundancy protocols.

Supplier Verification: Use verified trade data to ensure reliability and compliance with import regulations in Laos. By evaluating these options, organizations in Laos can select imported 1G core switches that meet both technical and operational requirements for enterprise, industrial, or specialized network deployments.
