Manufacturer ADSS Single-Mode Optical Cable

Overview

ADSS Fiber Optic Cable | All-Dielectric Self-Supporting Aerial Cable. AFL-ADSS® (All-Dielectric Self-Supporting) fiber optic cable is a non-metallic cabl.

Key Takeaways

Leading manufacturers of ADSS single-mode optical cables include Unitek Fiber, Abptel, AFL, Zion Communication, and Rayoptic, offering high-quality, all-dielectric, self-supporting cables for aerial installations.

Overview of ADSS Single-

Mode Optical CableADSS (All-Dielectric Self-Supporting) cables are non-metallic fiber optic cables designed to support their own weight between poles or towers without requiring metallic support or messenger wires. They are ideal for aerial installations along high-voltage power lines, roads, railways, and other outdoor environments, as they are immune to electromagnetic interference and electrically safe. Single-mode fibers (SMF) in these cables typically comply with G.

652 or G. 655 standards, providing low attenuation and long-distance communication capabilities.

Key Manufacturers

Unitek Fiber: Offers ADSS cables with 5 or 6 loose tubes, reinforced with aramid yarn and a central FRP core. Their cables are suitable for medium to large spans and complex terrains, supporting applications like FTTH and wide-area networks. Abptel: Produces ADSS cables in China with capacities up to 144 fibers.

Their single-mode options include G. 652 and G. 655 fibers, and they provide a complete cabling system including suspension hardware and termination enclosures.

AF

L: Manufactures AFL-ADSS® cables optimized for both distribution and transmission environments.

Their Flex-

Span designs allow flexibility in fiber counts and span lengths, and the cables are reinforced with aramid yarns for strength and durability. Zion Communication: Specializes in aerial ADSS cables with single or double sheath designs. Their cables are self-supporting, electrically safe, and suitable for high-voltage areas, with loose tube or ribbon fiber arrangements and water-blocking features.

Rayoptic: Offers single-jacket ADSS cables for spans of 50 to 200 meters. Their design includes twisted loose tubes around a non-metallic FRP core, water-blocking yarns, and aramid reinforcement, providing a reliable and cost-effective solution for outdoor networks. ApplicationsADSS single-mode cables are widely used for: Overhead power line communicationsFTTH (Fiber to the Home) deploymentsWide-area networks and town-to-town linksRailway, road, and river crossingsHigh-voltage and electrically sensitive areas These cables are designed to withstand environmental stresses, including wind, ice, and temperature variations, while maintaining optical performance.

Conclusion

For reliable ADSS single-mode optical cable, manufacturers like Unitek Fiber, Abptel, AFL, Zion Communication, and Rayoptic provide high-quality, all-dielectric, self-supporting solutions suitable for aerial installations in diverse outdoor environments. Selection can be based on fiber count, span length, sheath type, and specific project requirements.
