Micro-module Data Center Hot Aisle

Overview

Intelligent hot/cold aisle containment with fully enclosed design, combined with dual-source air conditioning and anti-condensation systems to effectively handle high-temperature, high-density scenarios. · Featuring efficient, reliable modular power gear, its standardized design with versatile components is factory-prefabricated. This cuts construction time, eases maintenance. Huawei FusionModule800 offers an intelligent small data center solution, perfect for financial, government, healthcare, and energy sectors, combining compact design with advanced management features for enhanced performance. Hot aisle and cold aisle containment are foundational concepts in data center design. Built with SPCC Cold Rolled Steel, this micro-module integrated intelligent system focuses on "Digital Smart. Through standardized modular design, intelligent temperature control systems, and localized construction techniques, this solution achieves rapid deployment, efficient operation, and green energy savings.
