# Nepal Engineering Network Cabinet Size

## Overview

Wall mount cabinets contain some different types depending on their design, such as single section and double section.

## Key Takeaways

Network and server cabinets in Nepal are available in various standard sizes, including 6U, 18U, and wall-mounted or floor-standing options with depths ranging from 450mm to 600mm.

### Standard Cabinet Sizes6

### U Wall-

Mount Cabinets: Compact cabinets suitable for small spaces, wiring closets, or community network setups. They are easy to install, manage, and provide anti-theft features. Depth options typically include 450mm and 600mm.

Wall-mounted cabinets can be single or double section depending on design requirements. 18U Floor or Wall Cabinets: Larger cabinets designed for more extensive network setups. For example, a 19-inch 18U rack cabinet with a depth of 600mm can support up to 300kg and can be mounted on walls or placed on the floor.

## Features and Considerations

Mounting Options: Cabinets can be wall-mounted or floor-standing, depending on space and equipment load. Wall-mounted cabinets require only 2–4 mounting points and are ideal for smaller installations. Material and Color: Most cabinets are made of durable metal and come in standard colors like RAL 9004 black.

Load Capacity: Smaller cabinets like 6U typically handle lighter equipment, while larger cabinets like 18U can support heavier networking devices and servers. Applications: These cabinets are suitable for networking, communication, CCTV, and IT infrastructure in offices, communities, and engineering setups. In Nepal, suppliers such as Platforms Hub, InfraSoft Solutions, and Buddha Trade Concern provide a variety of network and server cabinets to meet different engineering and IT requirements.

Choosing the right cabinet depends on the number of devices, available space, and installation type.
