Nigerian Zinc-Aluminum-Magnesium Cable Trays

Overview

Zinc-Aluminum-Magnesium (ZAM) Cable Tray A corrosion-resistant cable support system manufactured from steel substrate with advanced Zn-Al-Mg alloy coating.

Key Takeaways

Zinc-Aluminum-Magnesium (ZAM) cable trays in Nigeria are available in ladder, tray, and channel types, offering high corrosion resistance, durability, and efficient installation for industrial and commercial projects.

Overview of ZA

M Cable TraysZAM cable trays are manufactured from steel with a Zinc-Aluminum-Magnesium alloy coating, providing exceptional corrosion resistance, high strength, and long service life. The coating forms a dense protective film over the steel, including cut edges and perforations, making it ideal for harsh environments and outdoor installations. Optional organic coatings can further enhance performance.

Common Models and ConfigurationsLadder-Type Cable Trays: Designed for heavy-duty applications, allowing excellent ventilation for power and communication cables. Suitable for industrial plants, data centers, and energy projects.

Tray-

Type Cable Trays: Solid or perforated bottom trays that provide robust support for medium to heavy cable loads, often used in commercial buildings and infrastructure projects.

Channel-

Type Cable Trays: Compact and versatile, ideal for smaller cable runs or areas with limited space. Accessories: Bends, tees, covers, clamps, and supports are available to ensure easy installation and flexibility in routing. Nigerian Suppliers and AvailabilityNed-Tech: Offers a wide range of cable trays, including perforated, ladder, and solid-bottom types, with distribution across Nigeria and West Africa.

They provide technical support, fast delivery, and competitive pricing for both small and large projects. Local Manufacturers: Some Nigerian-made galvanized cable trays are available in standard sizes (e.g., 300mm x 50mm by 2. 5 meters), designed for strength, stackability, and quick installation.

Advantages of ZAM Cable Trays

Corrosion Resistance: Superior to traditional galvanized steel, suitable for coastal and industrial environments. Durability and Strength: Supports heavy cable loads while remaining lightweight for easier handling. Installation Efficiency: Pre-fabricated bends and accessories reduce installation time and labor costs.

Lifecycle Economy: Long-lasting performance reduces maintenance and replacement costs. ApplicationsZAM cable trays are widely used in: Industrial and manufacturing facilitiesData centers and ICT infrastructureEnergy and utility projects, including substations and renewable energy installationsCommercial and government buildings, hospitals, and schools For Nigerian projects, ZAM cable trays provide a reliable, corrosion-resistant, and cost-effective solution for cable management, with multiple models and accessories to suit diverse installation requirements.
