

Nordic cable tray bracket installation price

Overview

Our brackets are designed to provide a stable and secure installation of cable trays and cables, regardless of the installation environment, and are compatible with the X-Tray series products.

Key Takeaways

The installation cost for Nordic cable tray brackets typically ranges from \$5 to \$30 per meter, depending on material, type, and installation complexity.

Cost Breakdown

Material Impact: Steel brackets are the most common and cost-effective, generally ranging from \$5 to \$25 per meter for the tray system including supports. Aluminum brackets are lightweight and corrosion-resistant, costing slightly more, around \$6 to \$30 per meter. Stainless steel brackets are premium, highly durable, and suitable for demanding environments, with prices often between \$20 and \$100 per meter.

Installation Factors: Nordic cable trays are designed for quick and easy installation, requiring only an M8 bolt and basic tools, which can reduce labor costs. Fewer fasteners and a smaller number of parts mean faster assembly, potentially lowering overall installation expenses. Supports and brackets typically account for 20-30% of the total cable tray system cost, including bends, tees, and corner fittings.

Additional Considerations: Outdoor or harsh environments may require galvanized or stainless steel brackets, increasing costs. Custom solutions or longer spans between supports, as offered by Nordic Wire Tray, can reduce the number of brackets needed, providing cost savings. Labor rates vary by region, but the simplified installation process of Nordic brackets generally reduces installation time compared to conventional systems.

Practical Estimate

For a standard indoor installation using steel Nordic cable tray brackets: Material + Brackets: \$5-\$15 per meter Labor: \$2-\$10 per meter depending on complexity Total Estimated Cost: \$7-\$25 per meter For high-demand or outdoor installations with stainless steel: Material + Brackets: \$20-\$50 per meter Labor: \$5-\$15 per meter Total Estimated Cost: \$25-\$65 per meter These estimates provide a realistic budget range for planning Nordic cable tray bracket installations, accounting for both materials and labor while considering project-specific requirements.
