

Price of Columbia Armored Optical Cable

Overview

Armored optical cable, Shielded optical cable Find your armored optical cable easily amongst the 87 products from the leading brands (BANNER, CORNING, LAPP.

Key Takeaways

The price of Columbia Armored Optical Cable varies widely depending on fiber count, type, and construction, typically ranging from \$0. 50 to \$3. 00 per foot for standard armored fiber, with higher costs for specialty or plenum-rated cables.

Pricing Overview

Armored fiber optic cables are designed for durability and protection in harsh environments, which makes them more expensive than standard fiber cables. Prices depend on several factors: Fiber Type: Singlemode cables generally cost more than multimode due to higher performance and longer transmission distances. Fiber Count: Cables with more strands (e.g., 24, 48, 144 fibers) increase the price per foot or meter.

Construction: Options include corrugated steel armored for rugged outdoor use or aluminum interlocking armored for flexibility during installation. Plenum-rated cables, which are fire-resistant and low-smoke, also carry a premium. Length: Buying in bulk reels (e.g., 1,000 ft or more) reduces the unit cost compared to short lengths.

Manufacturer and Brand: Columbia cables may vary in price depending on the distributor and whether the fiber is Corning, Prysmian, or another brand.

Estimated Price Ranges

Standard armored fiber (singlemode or multimode): \$0.50–\$1.50 per foot for typical indoor/outdoor applications.

High-count or specialty armored fiber (plenum, riser, or bend-insensitive): \$2.00–\$3.00 per foot, depending on fiber count and jacket type.

Custom or large-scale orders: Prices may be negotiated with distributors, especially for 288–864 fiber strands or special constructions.

Purchasing Tips

Contact distributors directly: Suppliers like American Tech Supply or Fiber Savvy can provide exact pricing and lead times for Columbia Armored Optical Cable. Specify application: Indicate whether the cable is for OSP, riser, plenum, or FTTX to ensure correct construction and pricing. Consider pre-terminated options: Pre-terminated armored cables reduce labor costs and installation errors, though they may increase upfront cable cost.

For the most accurate and up-to-date pricing, it is recommended to call or email the supplier with your specific requirements, including fiber type, count, length, and installation environment.
