Price of Mongolian Fire-Resistant Cable Trays

Overview

Fire Resistant Trays Shop our fire resistant trays for reliable cable management and safety. Made from high-performance materials, these trays are perfect.

Key Takeaways

Fire-resistant cable trays in Mongolia typically range from $25 to $150 per meter, depending on material, type, and customization. OverviewFire-resistant cable trays are essential for protecting electrical wiring in industrial, commercial, and high-safety environments. They are available in ladder, perforated, mesh, and enclosed types, often made from galvanized steel, stainless steel, or aluminum for enhanced fire and corrosion resistance.

Stainless steel trays generally command higher prices due to superior durability and fire performance.

Price Factors

Material: Galvanized steel: $25–$60 per meterAluminum: $40–$80 per meterStainless steel: $80–$150 per meter Tray Type: Ladder trays: Moderate cost, suitable for heavy cablesPerforated trays: Slightly higher due to ventilation and fire safety featuresMesh trays: Flexible and lightweight, mid-range pricingEnclosed trays: Highest cost, offering full protection against fire and environmental hazards Customization: Length, width, load capacity, and coatings (e.g., intumescent paint) can increase costs. Supplier and Delivery: Local Mongolian suppliers like Brilltech Engineers Pvt. Ltd. and Super Cable Tray Pvt.

Ltd. provide tailored solutions, which may affect pricing based on order volume and installation support. Practical ConsiderationsFire-resistant trays are often combined with fireproof blankets or MI cable wraps in high-risk areas such as server rooms or chemical plants. Ensure compliance with UL 1724 or NFPA 70 standards for fire safety.

Installation costs may vary depending on building layout, seismic support requirements, and labor availability in Mongolia. In summary, for budgeting purposes, expect $25–$150 per meter for fire-resistant cable trays in Mongolia, with stainless steel and fully enclosed designs at the higher end of the range, while galvanized or perforated trays are more economical options.
