Price of New Optical Fiber Fusion Splicing Equipment

Overview

Price and other details may vary based on product size and color. Shop fiber fusion splicers designed for FTTH and telecom applications.

Key Takeaways

Optical fiber fusion splicing machines range from around $500 for basic manual models to over $10,000 for high-end automatic core-alignment units. Price Ranges by TypeManual Fusion Splicers: These require the operator to align fibers by hand and are generally the most affordable, with prices starting around $500–$1,500. They are suitable for low-volume or non-critical applications but require skill to achieve low splice loss.

Automatic Fusion Splicers: Fully automatic machines align and splice fibers with minimal human intervention. Prices typically range from $2,000 to $6,000, depending on features like weather sealing, battery life, and environmental tolerance.

Core-

Alignment Fusion Splicers: These high-precision splicers are essential for long-distance or high-performance networks. They use sensors and mirrors to align fiber cores accurately, resulting in very low splice loss. Prices for professional-grade core-alignment units can exceed $8,000–$12,000.

Hybrid or Ribbon Fusion Splicers: These combine features of manual and automatic splicers, allowing both automatic core alignment and manual adjustments. Prices generally fall in the $3,000–$7,000 range.

Factors Affecting Price

Alignment Method: Core alignment is more expensive than clad alignment due to higher precision. Splice Speed and Battery Life: Faster splicing and longer battery capacity increase cost. Environmental Durability: Machines with weatherproofing or temperature resistance are priced higher.

Additional Features: Ribbon splicing, counter-rotating fixtures, and advanced arc control add to the cost.

Where to Buy

Amazon offers a variety of consumer and professional models suitable for FTTH and telecom applications. Specialized suppliers like Splicermarket.com and OpticFiberTool.com provide factory-priced units from brands like Fujikura, Sumitomo, and INNO. Alibaba lists wholesale and telecom-grade fusion splicers, often with customizable features for bulk purchases.

In summary, the price of a fusion splicer depends heavily on its precision, automation, and intended application, ranging from a few hundred dollars for basic manual units to over $10,000 for professional core-alignment machines used in critical telecommunications networks.
