

Price of Outdoor Fiber Optic Splitter

Overview

Wallmountable Outdoor Splitter Box provides a flexible fiber management system for transitioning outside plant cable to inside cable and connectorized assemblies.

Key Takeaways

Outdoor fiber optic splitters typically range from \$10 to \$150 per unit, depending on type, port count, and split ratio.

Overview of Outdoor Fiber Optic Splitters

Outdoor fiber optic splitters are available in PLC (Planar Lightwave Circuit) and FBT (Fused Biconical Taper) types.

PL

C splitters are more precise and suitable for larger networks, while FBT splitters are often used for smaller deployments or custom ratios. They can be single-mode or multi-mode and come with various connector options such as LC, SC, or FC, with weatherproof enclosures for outdoor installation.

Price Ranges

Small splitters (1x2, 1x4, FBT type): Typically \$10–\$30 per unit, suitable for short-range or low-density networks. Medium splitters (1x8, 1x16, PLC type): Usually \$30–\$80, often integrated into outdoor distribution boxes for FTTH applications. High-capacity splitters (1x32, 1x64, PLC type): Can cost \$80–\$150 or more, depending on the manufacturer and environmental protection features.

Integrated Outdoor Distribution Boxes

Many outdoor splitters are installed inside fiber distribution boxes, which provide protection, splicing, and cable management. For example: 12-port outdoor distribution box with 1x8 PLC splitter: Supports up to 20-core fiber splicing, IP65-rated, suitable for wall or pole mounting. Prices for these boxes typically start around \$50-\$100, depending on features and quantity.

4-port outdoor splitter box: Includes SC/APC adapters and fusion splice trays, often priced around \$30-\$60 on retail platforms like Amazon.

Factors Affecting Price

Splitter type: PLC splitters are generally more expensive than FBT splitters. Port count and split ratio: Higher output ports and more complex ratios increase cost. Enclosure quality: Outdoor-rated, waterproof, UV-resistant boxes add to the price.

Quantity and supplier: Bulk orders from manufacturers can reduce per-unit cost. For accurate pricing, it is recommended to contact suppliers directly for quotes, especially for bulk or custom orders, as prices vary by region and specifications.
