Price of making 45-degree elbows for cable trays

Overview

Elbow 45° for cable tray, 100x200 mm, with unperforated side profiles, steel, pre-galvanised according to DIN EN 10346, incl. accessories. EAN 4013339129591.

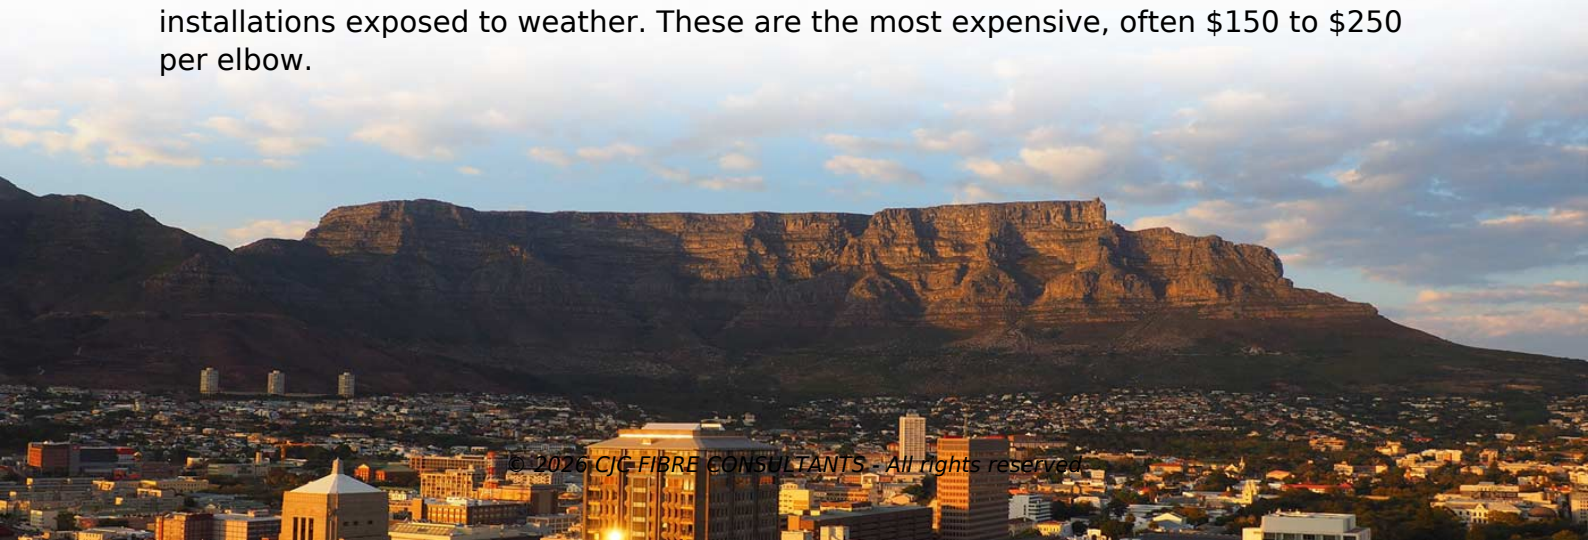

Key Takeaways

45-degree cable tray elbows typically range from $50 to $250 each, depending on material, size, and manufacturer.

Price Overview

The cost of 45-degree cable tray elbows varies based on material, dimensions, and type of bend: Aluminum elbows: Lightweight, corrosion-resistant, suitable for industrial and outdoor use. Prices generally range from $50 to $150 per elbow for standard sizes like 4 H x 6 W in. with a 24-inch bend radius (Eaton Electrical, Amazon) or 24-inch ventilated ladder elbows (Cablofil, Graybar). Steel elbows: Stronger and ideal for heavy-duty applications, including industrial plants and high-load environments.

Galvanized steel elbows typically cost $80 to $200, depending on width and height. Stainless steel elbows: Used in extreme conditions such as chemical plants or outdoor installations exposed to weather. These are the most expensive, often $150 to $250 per elbow.

Inside vs Outside BendsInside bends: Designed to route cables around internal corners. Pricing is similar to outside bends but may vary slightly due to fabrication complexity. Outside bends: Used for external corners or to navigate around structural obstacles.

Prices are comparable to inside bends, with minor differences depending on manufacturer and material.

Factors Affecting Cost

Material: Aluminum < Galvanized Steel < Stainless Steel. Dimensions: Larger width, height, or bend radius increases cost. Ventilation: Open-grid or ventilated designs for airflow and cable access may be slightly more expensive.

Brand and Certification: Products from Eaton, Cablofil (Legrand), or other certified manufacturers may carry a premium. Quantity: Bulk purchases often reduce per-unit cost.

Practical Tip

When selecting elbows, ensure the bend radius is at least 10 times the largest cable diameter to prevent cable damage and maintain proper bend radius, which can also influence the choice of material and cost. In summary, for standard 45-degree cable tray elbows, expect $50–$250 per piece, with aluminum being the most economical and stainless steel the most durable and expensive. Prices may vary by supplier and region, so checking vendor catalogs or contacting suppliers directly is recommended for exact quotes.
