Price of patch cord routing frame fixtures for computer rooms

Overview

PATCHBOX® 365 Cat.6a Modular Cassette System. Swap cables in seconds. The PATCHBOX Cassettes, Amazon.com: Server Rack Cable ManagementDiscover professional.

Key Takeaways

Patch cord routing frames and cabinets for computer rooms typically range from $50 for small wall-mounted frames to $1,000+ for high-density or full patch cabinets. Types and Price Ranges1.

Wall-

Mounted Patching Frames

Designed for smaller networks where a full cabinet isn't required. Can house patch panels and shallow 19" rackmount equipment. Lightweight, easy to install on most walls.

Typical price: $50–$200 depending on depth and port capacity. 2.

High-

Density Patching Frames

Can accommodate up to 42 patch panels or 24-way panels. Suitable for mounting active equipment and standard power distribution units. Fully welded steel construction, open frame design.

Typical price: $300–$600 depending on size and features. 3. Patch Cabinets / Rack CabinetsEnclosures for managing all network connections, including patch panels, switches, and routers.

Available in 10" (compact) and 19" (standard professional) sizes. Lockable doors and sturdy housing for security and organization. Ideal for medium to large offices or data centers.

Typical price: $400–$1,200+, depending on size, color, and included accessories. 4.

Patch Panels

Ethernet patch panels (Cat5e, Cat6, Cat6a) and fiber optic panels. Rack-mountable or modular designs for easy installation. High-density panels allow more ports in limited rack space.

Typical price: $20–$150 per panel, depending on type and port count.

Considerations for Selection

Port Requirements: Determine the number of connections needed now and in the future. Rack Compatibility: Ensure frames or cabinets fit standard 19" racks if required. Network Type: Choose between Ethernet or fiber panels based on your network speed and distance requirements.

Scalability: High-density frames and modular cabinets allow easier expansion. Installation: Wall-mounted frames are simpler to install, while full cabinets may require professional setup. By combining patch panels with the appropriate frame or cabinet, you can achieve organized, scalable, and secure network infrastructure for any computer room or data center.
