Price of server rack enclosure sealing strips

Overview

Air Flow Seals For Gaps Around Servers and Racks The Cool Shield AirStrip is an expanding foam tape designed to prevent unwanted air loss from gaps in cont.

Key Takeaways

Server rack enclosure sealing strips typically range from $50 to $150 per pack, depending on type, size, and brand.

Acrycell Sealing Tape

The Aisle

Lok Acrycell sealing tape is designed to seal gaps between server racks, cabinets, or other enclosures to prevent airflow loss and dust ingress. It comes in 2" thick rolls with a minimum compressed thickness of 0. 87" and maximum expanded thickness of 2".

The tape is sold in packs of 5 rolls, suitable for multiple racks or larger installations. Prices for similar packs generally range from $100 to $150 per pack, depending on the supplier and shipping options. Cool Shield AirStripThe Cool Shield AirStrip is an expanding foam tape used for gaps above or below containment panels, next to rack rails, or under server cabinets.

It improves cooling efficiency by preventing bypass airflow. Pricing varies by size and length, but typical packs of multiple strips are usually in the $50–$120 range.

Brush Strips

For applications where dust protection is needed but high sealing is not critical, brush strips from icotek are a cost-effective alternative. These strips are suitable for 10" or 19" server racks and can be cut to required lengths. Prices for brush strips generally start around $50 per strip, with custom lengths or specialized mounting options increasing the cost.

Considerations

Pack size: Most sealing strips are sold in packs of 5 or more, so total cost depends on the number of racks. Material and thickness: Foam, Acrycell, or brush strips vary in sealing efficiency and price. Installation: Some products expand over time or conform to uneven gaps, which may reduce labor costs.

Supplier: Prices can differ between online retailers like Data Center Store, Server Rack Online, or icotek distributors. For a typical small to medium data center, budgeting $100–$150 per pack of Acrycell tape or $50–$120 per pack of foam strips is a reasonable estimate for sealing strips to improve airflow and dust control.
