Qatar Cable Tray Production

Overview

Home | Al QatarFrom cable trays and ladders to low-voltage switchgear panels, we offer a full suite of solutions—all under one roof. This reduces procureme.

Key Takeaways

Qatar hosts several advanced cable tray production lines capable of manufacturing high-quality cable management systems for industrial and commercial applications.

Key Manufacturers and Production Capabilities

Advance Line Cable Management System L. L. C operates a modern factory in Birkat Al-Awamer, Doha, producing cable trays, ladders, trunkings, basket trays, strut channels, and GI switch boxes.

Their production line is capable of producing 50 GI switch boxes per minute, and all products are manufactured according to British standards, ensuring durability and compliance for industrial installations. Altura Industries is another leading manufacturer in Qatar, offering cable trays, ladders, trunking, and wire basket systems. They specialize in GRP/FRP materials for harsh environments such as petrochemical, marine, and oil and gas industries.

Their cable ladders and trays are designed for smooth cable pulling and are compliant with BS EN 61537: 2007, providing reliable performance for large-scale projects.

Trans

Delta International Industries L. L. C (operating under the Delta brand) is part of the European TRANSCON Global Group.

They manufacture a wide range of cable management systems, including cable trays, ladders, trunking, flush floor, and underfloor systems. Their production facilities are equipped with state-of-the-art infrastructure, ISO-certified processes, and in-house coating divisions, ensuring high-quality, durable, and safe cable support solutions for major projects across Qatar and the GCC. Qatar Technical also provides cable support systems using pre-galvanized steel and offers both solid and perforated cable trays.

Their products are designed for flexible installation and efficient airflow to prevent overheating of cables, catering to industrial and building construction needs.

Product Types and Standards

Cable Trays: Solid or perforated, supporting heavy or high-volume cabling. Cable Ladders: Ideal for long spans and industrial applications. Cable Trunking: Wall-mounted or underfloor, protecting and guiding cables.

Wire Basket Trays: Lightweight, high-resistance steel for easy cable routing. Strut Channels: Slotted or plain, used for supporting cable systems. All major manufacturers in Qatar adhere to international standards such as British Standards (BS) and ISO certifications, ensuring safety, reliability, and compliance for industrial and commercial installations.

SummaryQatar's cable tray production lines are highly advanced, offering a variety of materials and designs suitable for diverse applications, from commercial buildings to heavy industrial environments. Leading manufacturers like Advance Line, Altura Industries, and TransDelta provide ISO-certified, standard-compliant products with robust production capacities, making Qatar a reliable hub for cable management solutions.
