

Ranking of Original Optical Module Manufacturers

Overview

The latest ranking of the TOP10 global optical module suppliers. A few days ago, LightCounting, a well-known market research organization in the optical.

Key Takeaways

The leading global optical module manufacturers include InnoLight, II-VI (Finisar), Huawei, Hisense Broadband, Eoptolink, and Accelink, reflecting a growing presence of Chinese suppliers in the market. Top Optical Module Manufacturers (2021-2025) Based on the latest LightCounting report and industry analyses, the current top optical module suppliers are: InnoLight Technology – Tied for first place in market share, InnoLight specializes in high-speed optical modules for cloud data centers, including 100G, 200G, 400G, and 800G modules, with strong adoption by major North American cloud vendors such as Meta, Google, and Amazon.

II-VI Incorporated (including Finisar) – A leading U. S.-based supplier, II-VI offers a broad portfolio of optical modules, laser diodes, and photonic materials, strengthened by the acquisition of Finisar. Huawei (HiSilicon) – Ranked third, Huawei produces coherent DWDM modules and high-end optical transceivers, investing heavily in local supply chains due to U.

S. export restrictions. Hisense Broadband – Positioned fifth, Hisense focuses on broadband optical modules and telecom solutions. Eoptolink – Ranked seventh, Eoptolink has expanded its market share in high-speed optical modules, including 400G and 200G products.

Accelink Technologies – Eighth in the ranking, Accelink provides a vertically integrated supply chain covering chips, modules, and systems, with a focus on telecom and data center applications. Cisco – Included after acquiring Acacia, Cisco now offers optical modules integrated with its networking equipment. Other notable suppliers – Xutron Technology, Luxtera (acquired by Cisco), and Chinese companies like Huagong Tech and Linktel are also significant players in the global optical module market.

Market Trends

Chinese suppliers are rising: Companies like InnoLight, Eoptolink, and Accelink have improved their rankings, reflecting increased domestic manufacturing and investment in local supply chains. Acquisitions shape the market: II-VI's acquisition of Finisar and Cisco's acquisition of Acacia and Luxtera have consolidated technology and market share. High-speed modules dominate: 400G and 800G modules are increasingly adopted in cloud data centers, with coherent modules gaining traction for backbone networks.

Global supply chain shifts: Many Chinese suppliers are relocating production to Asia to mitigate geopolitical risks and ensure access to critical ICs.

Key Considerations for Choosing Suppliers

When evaluating optical module manufacturers, factors include data rate, form factor, transmission distance, power consumption, reliability, vendor support, and security features. Leading suppliers like Lumentum, Ciena, and Infinera also provide specialized solutions for telecom and data center applications, complementing the top-ranked manufacturers. This ranking highlights the dynamic nature of the optical module market, with Chinese suppliers increasingly challenging traditional U.

S. and Japanese leaders, driven by cloud data center demand, 5G deployment, and coherent optical technology adoption.

The latest ranking of the TOP10 global optical module suppliers ...

A few days ago, LightCounting, a well-known market research organization in the optical communication industry, released the latest market report and updated the TOP10 ranking of global

Global Optical Module Suppliers TOP10 Ranking Changes

Below are the changes in the global optical module supplier TOP10 ranking from 2021 to 2023, published by LightCounting, a market organization in the optical communications industry:

Top 10 Optical Module Brand & Manufacturers

Find the Top 10 Optical Module brand, manufacturers, and exporters. Get the contact details and addresses of companies producing Keywords.

10 companies in the optical transceiver industry chain 2024

To help you choose the best partner, this article will analyze and introduce 10 companies in the optical transceiver industry chain for you.

Top 10 Global Optical Modules in 2023: Chinese Manufacturers

Recently, LightCounting, a market research institution in the optical communication industry, released the latest version of the 2023 global optical module TOP10 list.

Top 10 Optical Module Manufacturers' Annual Reports ...

By 2025, its 800G optical module shipments will exceed 5 million units, making it the global "shipment champion" in the optical module industry, demonstrating significant economies of

Top Optical Modules Companies & How to Compare Them (2025)

Access detailed insights on the Optical Modules Market, forecasted to rise from USD 3.5 billion in 2024 to USD 8.2 billion by 2033, at a CAGR of 10.3%. The report examines critical market...

Ranking of optical module chip companies | Weyland

With technological advancements, several companies have emerged as global leaders, each excelling in areas like VCSEL arrays, coherent optics, silicon photonics, and digital diagnostics.

Top 10 Optical module manufacturers in the World 2025

How do I choose the right optical module manufacturer? When selecting an optical module manufacturer, consider factors like product quality, reliability, certifications, and customer support.

10 companies in the optical transceiver industry chain 2024

The optical module is in the middle of the industrial chain, and the upstream industry of optical modules mainly includes PCB, optical chips, optical

KB: Creating protection for Hyper-V VMs on Windows Server 2012

First published on TECHNET on Oct 11, 2012 Here's a new Knowledge Base article we published. This one talks about an issue where using DPM 2012 SP1 to create a protection group for
