Recommended manufacturers of fiberglass cable trays in North Africa

Overview

Best Fiberglass Cable Tray | Best Cable Tray in Africa |IraqOur cable management solutions are world-class and they are built to deliver optimum performanc.

Key Takeaways

Top fiberglass cable tray manufacturers in North Africa include EFG Composites, El Sewedy Electric, Unique Fiberglass & Composites, and Protik, all offering durable, corrosion-resistant FRP/GRP solutions. Leading ManufacturersEFG Composites (Egypt) EFG Composites specializes in fiberglass ladder and perforated cable trays designed for corrosive and critical environments. Their products use pultruded polyester or vinylester resins with UV stabilizers and surfacing veils for enhanced corrosion resistance.

They offer a wide range of thicknesses (1. 2–3. 0 mm) and widths (50–1000 mm), along with fittings like bends, tees, reducers, and coupler plates.

EF

G trays are suitable for power plants, refineries, paper mills, and laboratories, providing long-term durability and cost-effective performance. El Sewedy Electric (Egypt) El Sewedy Electric is a major Egyptian manufacturer of electrical products, including fiberglass cable trays. They serve markets across Africa and the Middle East, offering solutions for energy, infrastructure, and telecommunications projects.

Their products comply with regional and international standards, ensuring reliability in diverse climates. Unique Fiberglass & Composites This company produces GRP/FRP cable trays and ladders using high-temperature polymerization pultrusion. Their trays are robust, corrosion-resistant, and non-welding, providing excellent support for cables in harsh environments.

Vinyl ester and epoxy resins are used to enhance abrasion resistance, chemical resistance, and electrical insulation, making them suitable for industrial and electrical installations. Protik (North Africa & Iraq) Protik manufactures fiberglass cable trays that are non-conductive, non-magnetic, and corrosion-resistant, ideal for low-voltage, telecommunication, and fiber-optic cables.

Their FR

P trays are designed for chemical plants and construction industries, offering solid or perforated bottoms to protect cables from environmental damage. Protik emphasizes quality testing and global standards compliance.

Key Considerations

Resin Type: Polyester for general applications; vinylester for strong acids, alkalis, or halogenated environments. Load Capacity & Span: Ensure the tray supports the static weight of your cables and fits your installation span. Fittings & Accessories: Check availability of bends, tees, reducers, and couplers for complex routing.

Compliance: Choose manufacturers adhering to regional and international standards for safety and durability. These manufacturers provide reliable, corrosion-resistant fiberglass cable trays suitable for industrial, commercial, and infrastructure projects in North Africa.
