Remove the core switch s IP address

Overview

The Remove-NetIPAddress cmdlet removes an IP address and its configuration. [[-IPAddress]] [-InterfaceIndex] [-InterfaceAlias] [-AddressFamily] [-Type] [-PrefixLength] [-PrefixOrigin] [-SuffixOrigin] [-AddressState. Historically both switches used IPs on the 192. 0/23 subnet as their management IP/VLAN1 VRRP IP. On the 5130s we've sucesfully done this, in summary, what we did was, created vlan16, assigned the vlan16 interface an IP. we have cisco 9400 series core switches and that connect to SD-WAN routers. Now in Core switches, we have many SVI's and they are acting as a gateway for the Vlans. We have OSPF routing protocol that performs l3 routing and all the connected interfaces are redistribute into ospf using. This guide includes detailed information on the switch software, including how to operate and use the management functions of the switch. Finding the IP address of your network switch is crucial for a variety of tasks, from.
