Seal strip for wiring terminals in distribution box

Overview

Each terminal strip features #10-24 studs spaced ¾” apart with built-in barriers to prevent accidental shorts or arcing between terminals. Ideal for use with insulated ring or spade terminals, they provide consistent, low-resistance connectivity while streamlining your. Terminal blocks are a form of electrical interchange that distributes power around your fleet vehicles. Electrical terminal blocks provide a convenient way to connect individual electrical wires by connecting different circuits together and providing an electrical ground for a circuit. The Amphenol Air LB France's 1100 series consists of Quick junction modules for signal and low current distribution, where sealing, space and weight-saving are prime requirements. UL-rated for up to 600 volts, these strips are engineered for environments requiring high durability, thermal.
