Specifications for Integrated Protection Device Distribution Box

Overview

Distribution Box Specifications & IEC Protection StandardsEvaluate distribution box parameters, bus bar configurations, and overcurrent protection requirem.

Key Takeaways

Integrated Protection Device Distribution Boxes provide centralized electrical protection with IP-rated enclosures, modular configurations, and multiple safety features for industrial, commercial, and outdoor applications.

Key Features

Protection Functions: These distribution boxes integrate multiple protection functions including short circuit, overload, overvoltage, and leakage protection, ensuring safe operation of connected electrical circuits and devices. Enclosure Material and Durability: Commonly made from engineering plastics like Polycarbonate (PC) or thermoplastics, these boxes offer high mechanical strength, weather resistance, and electrical insulation. Some models also use epoxy-coated or powder-coated stainless steel for enhanced durability.

Ingress Protection (IP) Rating: Integrated distribution boxes are designed to meet IP65 or higher, providing dust-tight and water-resistant protection suitable for indoor and outdoor environments. Certain industrial models can reach IP67, offering temporary immersion protection. Standards Compliance: These devices comply with international standards such as IEC60529, IEC62262: 2021, IEC60695-2-10: 2013, and may also have ISO certifications for quality and safety.

Modularity and Configuration: Distribution boxes are available in single, double, or triple layers, with 4–39 ways for circuit connections. Modular designs allow flexible installation, easy expansion, and integration of busbars, circuit breakers, fuses, and communication modules. Functional Components: Typical components include: Circuit breakers and fuses for overload and short-circuit protectionBusbars for organized power distributionIndication lights for mains power statusOptional energy monitoring units and communication modules for smart management Applications: These boxes are suitable for industrial plants, commercial buildings, photovoltaic systems, urban and rural power grids, and hazardous areas when certified for ATEX or IECEx zones.

Installation and Customization: Many models are pole-mounted or wall-mounted, compact in size, and can be customized for specific voltage, current, or environmental requirements.

OEM and OD

M services are often available for tailored solutions. Temperature and Environmental Resistance: Certain models can operate in extreme temperatures (as low as –40°C) and withstand UV exposure, rain, and dust, making them suitable for outdoor installations.

Summary

Integrated Protection Device Distribution Boxes combine robust enclosures, modular design, and multiple protection functions to ensure safe, reliable, and efficient power distribution. They are IP-rated, standards-compliant, and customizable, making them ideal for a wide range of industrial, commercial, and outdoor electrical applications.

JP Series Integrated Distribution Box

JP series outdoor integrated distribution box is an outdoor integrated distribution device that combines multiple functions such as metering, outgoing line, and reactive power compensation. It has local

SPi Integrated Energy Distribution Box (4010)

Integrated MCB mounting base with compact structure for easy installation, ensuring secure breaker fixation and stable busbar connection. Complies with lEC/EN

Distribution boxes – For modular and decentralised

We provide you with information on our distribution boxes for download. Download our product catalogue for sensor-actuator cabling and circular connectors or our

Ex Local Control Stations & Distribution Boxes

Atex control stations, explosion protected control units and distribution boxes made stainless steel maritime grade AISI 316L or AISI 304L. Atex Delvalle provides a custom build facility for Hazardous

ETIBOX Distribution boards

Enclosures made of fiberglass-reinforced polyester RAL 7035, designed for extreme conditions. Polyester reinforced with fiber glass enclosures provide double insulation class in IP66 protection.

Electrical Distribution Boxes for Power Distribution | Wieland

From decentralized energy, signal and data distribution to distribution boxes for smart buildings, we offer the right solution. We mount any electronics in the manifolds! All options are open here, and the
