Vietnam Optical Cable Distribution

Overview

Viet FiberViet Fiber is a leading Vietnamese manufacturer specializing in high-performance Fiber Optic and Copper Structured Cabling Solutions Optical Fibr.

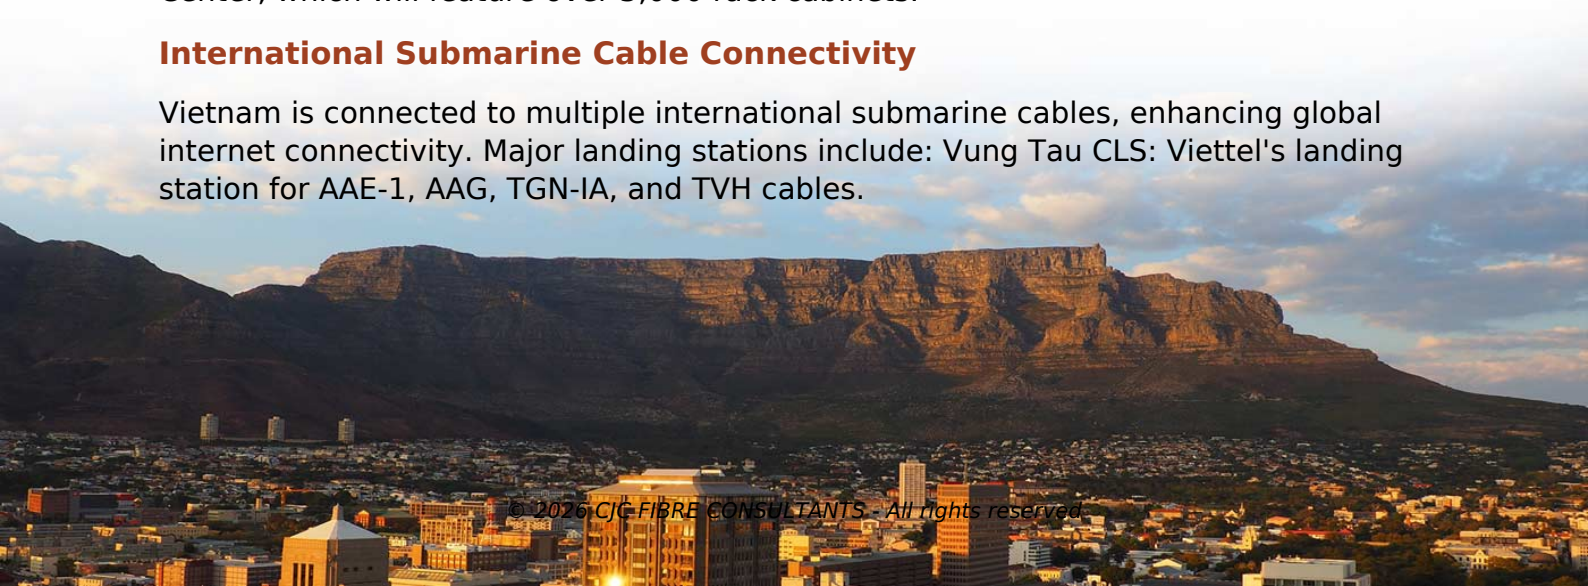

Key Takeaways

Vietnam's optical cable network combines extensive domestic fiber infrastructure with high-capacity international submarine cables, supporting rapid digital growth and 5G expansion. Domestic Fiber Optic NetworkVietnam's domestic fiber optic network has expanded rapidly, driven by increasing demand for high-speed internet, 5G deployment, and government digital transformation initiatives. By the end of 2022, major ISPs such as VNPT, Viettel, and FPT Telecom collectively served over 18 million fiber customers.

The network is concentrated in urban centers like Hanoi, Ho Chi Minh City, and Da Nang, which are hubs for broadband adoption and smart city projects. The domestic fiber market includes fiber optic cables, transceivers, amplifiers, and splitters, with fiber optic cables holding the dominant share due to their role in high-speed data transmission. Key operators like FPT Telecom and Viettel Group provide advanced cables and are expanding data center infrastructure, such as FPT's District 9 Data Center, which will feature over 3,000 rack cabinets.

International Submarine Cable Connectivity

Vietnam is connected to multiple international submarine cables, enhancing global internet connectivity. Major landing stations include: Vung Tau CLS: Viettel's landing station for AAE-1, AAG, TGN-IA, and TVH cables.

Danang CL

S: Landing point for SMW3 cable. Quy Nhon City: Landing station for Asia Direct Cable (ADC), Vietnam's largest-capacity submarine cable system with 50Tbps, linking Vietnam to China, Hong Kong, Thailand, the Philippines, Singapore, and Japan.

The AD

C system significantly increases Vietnam's international bandwidth, offering faster speeds and direct connections to major Asian internet hubs, improving reliability and backup capacity.

Key Players

Viettel Group: Military-run telecom operator, major investor in submarine cables including ADC, AAE-1, and AAG.

VNP

T: State-owned provider, operates multiple landing stations and extensive domestic fiber networks.

FP

T Telecom: Private ISP, expanding fiber-to-the-home (FTTH) and data center infrastructure.

CM

C Telecom, Hanoi Telecom, Netnam: Provide metro and local loop services.

Market Trends and Government Initiatives

The Vietnamese government promotes digital transformation through policies supporting smart cities, broadband penetration, and Industry 4. 0 adoption. The New Telecoms Law (2023) regulates both traditional and non-traditional telecom services, including OTT, cloud computing, and data centers, facilitating infrastructure growth.

The fiber optic market is expected to continue growing due to 5G rollout, IoT deployment, and increasing demand for low-latency, high-speed connectivity, with foreign investment and strategic partnerships further accelerating network expansion. Vietnam's optical cable network, combining robust domestic fiber infrastructure with high-capacity international submarine cables, positions the country as a rapidly advancing digital hub in Southeast Asia.
