Key Takeaways

The XXD distribution box is a 19-inch rack-mount fiber optic distribution frame available in 1U or 2U sizes, supporting 12, 24, or 48 cores.

Overview

The XX

D distribution box is designed for fiber optic network management and distribution. It is typically rack-mounted in standard 19-inch cabinets and comes in 1U or 2U heights, allowing flexible installation in data centers or telecom rooms. The box is suitable for organizing and protecting fiber optic cables while providing easy access for maintenance and expansion.

Core Capacity and Configuration12-core, 24-core, and 48-core options are available, accommodating different network sizes and requirements. The box supports fiber splicing, patching, and termination, ensuring efficient cable management. It is compatible with standard fiber optic connectors and adapters, making it versatile for various network setups.
